Question No.	Description	Marks
1	State the formula radius of curvature for parametric curves.	2
2	Find The Asymptotes of the following curves: $x^3 + yx^2 - xy^2 - y^3 - 3x - y - 1 = 0$.	2
3	Conclude the radius of curvature of the curve $y = a \sinh 2x$.	4
4	If $f(x) = 2x^3 - 9x^2 + 12x + 6$ Then Execute Maximum and Minimum Value in $[0,2]$	4
5	State and Prove the Leibnitz Theorem.	8
